CAREER OBJECTIVE

I aim to build sustainable, impactful technology solutions while continuously strengthening my software development skills through hands-on learning and innovation.

INTERNSHIP

Winfomi, Salesforce Developer Intern

08/2025 – 01/2026

Gained hands-on experience in Apex, Lightning Web Components (LWC), SOQL, Salesforce customization, and CRM application development through real-world projects. Contributing to the Project Help Agent application by developing features using LWC and Apex to support workflow automation and task management.

EDUCATION

Bachelor in Computer Science and Engineering, Kongu engineering college

2024 – 2027 | Erode

CGPA: 7.47(till now)

Diploma in Computer Engineering, Er.Perumal Manimekalai Polytechnic College

2021 – 2024 | Hosur

Percentage: 83%

SKILLS

Programming Languages

Java, C (Basic)

Web Technologies

HTML, CSS, React & Javascript

Database Management

MongoDB, Salesforce CRM

Tools & Platforms

Git, GitHub, VS Code & Salesforce

LANGUAGES

• English

• Kannada

• Tamil

• Telugu

CERTIFICATIONS

MongoDB Associate Developer - MongoDB University

09/2024 – 03/2025

Completed certification validating skills in schema design, CRUD operations, aggregation pipelines, and MongoDB integration with Node.js.

Oracle Java Foundations - Oracle MyLearn

10/2025 – 12/2025

Completed certification validating core Java knowledge, including OOP principles, data types, control flow, arrays, and basic exception handling.

AREA OF INTEREST

Database Management System(DBMS)

Web Development

Salesforce Administrator

PROJECTS AND PRESENTATION

Project Help Agent – Salesforce(Project)

This is an AI-powered Project Help Agent for Salesforce task management. It helps employees find similar or related tasks, supporting better task tracking and efficiency inside a project management portal.

Transport Management System(Project)

A small Flask web app for college bus tracking and transport management.

-User registration and login with admin/regular user roles

-Admin dashboard for managing routes, buses, and transport details

-Contact form for inbound messages

-Templates for routes like login, register, dashboard, transport_management, add_route, manage_buses, track_bus

-Uses SQLAlchemy models in config.py and Flask-Login for auth

Food Delivery Service(Project)

Application Frontend: HTML, CSS | Backend: Express.js | Database: MongoDB

Developed a web-based application for online food ordering with user authentication, cart management, order tracking, and payment integration.

Digital Twin Systems – Bridging the Physical and Virtual Worlds(Paper)

Presented at Coimbatore Institute of Technology

Future of Electric Vehicles – Opportunities and Challenges(Paper)

Presented at Sri Ramakrishna Institute of Technology

SOFT SKILLS

• Team work & Collaboration

• Good Communication

• Leadership

• Time Management
